TITLE : PROJECTION TYPE DISPLAY DEVICE

ABSTRACT : PROBLEM TO BE SOLVED: To provide a projection type display device wherein a high cooling efficiency is obtained for a liquid crystal panel, and moreover, the configuration is simple.

SOLUTION: In the projection type display device having a liquid crystal panel 60 in an optical system, toward which a cooling fan is arranged, a wind direction control board 7 is installed on the surface of a panel support board 63 or an adjustment board 64 for diagonally applying a part of airflow from the air cooling fan onto the surface of a liquid crystal panel 60. The wind direction control board 7 has a diagonal board part 7a for guiding a part of the airflow to the surface of the liquid crystal panel 60 by inclining in the direction of the airflow from the cooling fan.
